**Conti** (Prime Contractor)—Conti’s dedicated, skilled employees self-perform construction, environmental remediation, and infrastructure security projects of exceptional merit. Our project delivery teams are supported by the most modern management information systems, enabling us to complete assignments quickly, safely, and within budget. Our work ethic stresses quality in every aspect, and we consistently exceed customer expectations via exceptional responsiveness, proactive project tracking and reporting, and innovative cost saving strategies and execution.

### Corporate Profile

- ◆ 100-year history in construction with 27 years of successful environmental project performance
- ◆ Prime contractor for government ID/IQ programs with FFP and CR construction and remediation TOs
- ◆ Bonding capacity of \$150M/project with \$450M aggregate
- ◆ Extensive experience working at airports, railways, ports, highways, buildings, power plants, and utilities
- ◆ Audited, FAR-compliant financial, procurement, and management control systems

**ITSI** – Innovative Technical Solutions, Inc. (ITSI) is a small business focused on providing design-build infrastructure and environmental solutions. ITSI provides planning, design and construction of vertical and horizontal infrastructure and facilities as well as comprehensive environmental solutions including studies, design, and remediation. ITSI has a staff of over 300 engineers, scientists, equipment operators, site superintendents, and project managers. ITSI has the capacity to self-perform all phases of construction and environmental projects to meet critical and demanding schedules.

**TN & Associates**– TN&A is a minority, woman-owned, small business specializing in environmental services, infrastructure engineering, natural resources, and construction services. Established in 1989, we now employ a staff of nearly 200 engineers, geologists, construction managers, site superintendents, surveyors, chemists, biologists, ecologists, health and safety specialists, risk assessors, and CADD/GIS technicians. We execute remedial and traditional construction including management, demolition, removal, replacement, repair, upgrade, and installation of buildings, structures, and remedial systems.

**EnergySolutions**– EnergySolutions offers diverse capabilities for handling and processing of radioactive materials, including volume reduction, metal melting, incineration, and compaction facilities. Their key capabilities include full-scope D&D services, onsite radwaste management, provision of containers, casks, and packaging services, a transportation fleet, instrumentation services, and disposal of Class A, B, and C wastes.

**InfoPro**– InfoPro Corporation has been providing Munitions Response (UXO/OE) services to the US Army Corps of Engineers and commercial customers since 1999. Our emergency services include Construction Support; UXO Avoidance; Work Plans; Site Investigations and Clearance Services. InfoPro Corporation provides knowledgeable program/project management as well as highly trained EOD/UXO trained personnel to deal with the potential explosive and fragmentation hazards associated with Munitions Response work.
